

Award Winning Services

The New England Center for Children® has 40 years of experience helping children with autism. Started in 1975 with only \$30,000 from the Massachusetts DMH, it has grown to be one of the most respected autism institutes in the world. Today, NECC is the global leader in providing effective, evidence-based educational services to children with autism. We rely on the science of applied behavior analysis (ABA) to help children with autism reach their greatest potential.

We serve children ages 18 months to 22 years. Our mission is to transform the lives of children with autism worldwide through education, research, and technology.

Academic Instruction

We create a positive environment for our students and staff to foster cooperative success. Our academic instruction, often 1:1 or 1:2, looks at each individual's needs to customize a curriculum. Offerings include home-based, day school, and residential services.

Speech and Language

Speech and language skills are a critical part of development. Our speech and language pathologists develop individual programs to best suit each student's learning needs, including using augmentative and alternative communication (AAC) — methods to supplement speech or writing for those with impairments in the area.

Social/Leisure Skills

We focus just as much attention on social and leisure skill development as our academic and other focus areas. Our newly remodeled Dillon Arledge Student Center provides dedicated space for students to further explore music, art, library, and leisure time.

Adapted Physical Education

Our on-site Michael S. Dukakis Aquatic Center means that students participate in regular, scheduled swim instruction, and our gymnasium includes the latest in adapted physical education equipment — specialized bikes, mats, balls — to build motor skills and improve fitness.

Health and Wellness

Our wellness center is a unique component of our facility. An on-site dental desensitization suite, exam rooms, and waiting room combine real-need, immediate health services for our students and teach them skills needed to attend medical appointments outside the school.

Family Services

Our dedicated Family Services department makes sure parents and families are in the know on student activities, and provides support to our dedicated NECC Parents' Organization.

ACE®

Our Autism Curriculum Encyclopedia® is a cloud-based teaching tool used at NECC and around the world. It gathers 40+ years of best teaching practices and puts it at the fingertips of our educators. Real-time assessment means a student's curriculum can be modified quickly to ensure progress.

Vocational Training

NECC has been teaching vocational skills for more than 25 years to children with autism. Vocational training prepares students for an independent life. Workplace skills development includes discovering interests and strengths, attending to task, following directions, and mastering responsibility. Our students work in a variety of companies in the area, including Walgreens, Starbucks, and TJX.
